

Extent Of Installation Covered By This Report:23

Agreed Limitations Including The Reasons:323

Agreed With:232

Operational Limitations Including The Reasons:232

The inspection and testing detailed in this report have been carried out in accordance with IEC60364. It should be note that cables concealed within trunk/trench and conduits, under floors and generally within the fabric of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to inspection:3232

Observations:

Further actions:

Reference number in report:

Comment:

Where the overall assessment of the suitability of the installation for continuous use above is stated as unsatisfactory, I/We recommend that any observations classified as “danger present” (Code C1) or “potentially dangerous” (Code C2) are acted upon the matter of urgency.

Investigation without delay is recommended for observations identified as “Required further investigation”. Observations classified as “Improvement recommended” (Code C3) should be given due consideration. Subject to necessary remedial action being taken, I/We recommended that the installation is further inspected and tested by .....Date.:2021-08-12
